eSystems MTG GmbH
Bahnhofstraße 100
73240 Wendlingen/Germany

Telefon: +49 7024 40598-0

E-Mail: info@esystems-mtg.de

Internet: www.esystems-mtg.de

eSystems MTG GmbH develops and manufactures technologically leading AC charging solutions for intelligent and connected charging of electric cars. Core products are mobile and permanently installed AC charging systems, as well as modular system solutions for connection to smart homes and integration into the smart grid. The technologies of eSystems enable grid and user-friendly charging. eSystems is a certified automotive supplier. Its customers include well-known car manufacturers. eSystems was part of the electronics service provider KATEK SE, which was acquired by the listed Kontron Group in March 2024. Since the takeover, eSystems has been part of the 'GreenTec' division of Kontron AG, the world's leading provider of IoT technology. Kontron employs around 8,000 people worldwide.

Management: Jochen Paukert, Sven Heidenwag

Employees: 83

Founding year: 2016

Locations: Wendlingen a.N.

Product portfolio:

- Intelligent and fully networked AC charging equipment (mobile charging cable ICCPD) up to 22 kW, approved worldwide
- UL Wallbox 19.6 kW (for the US market)
- Smart home components for intelligent energy management
- Fully networked wallbox (for IEC)

Core competencies:

- Connectivity: ISO 15118 standard (plug'n charge, HEMS, tariff plan, PV self-consumption charging); EEBUS, OCPP, OTA updates (over the air updates)
- Highly integrated system electronics
- Safety: Worldwide product certifications (131 countries)

Target markets: OEM energy (photovoltaics, storage, heat pumps, energy management), OEM charging infrastructure (wallbox manufacturers), OEM automotive (vehicle manufacturers), charge point operators (CPOs), electrical retailers, installers and service providers.
